

Assignment-13:

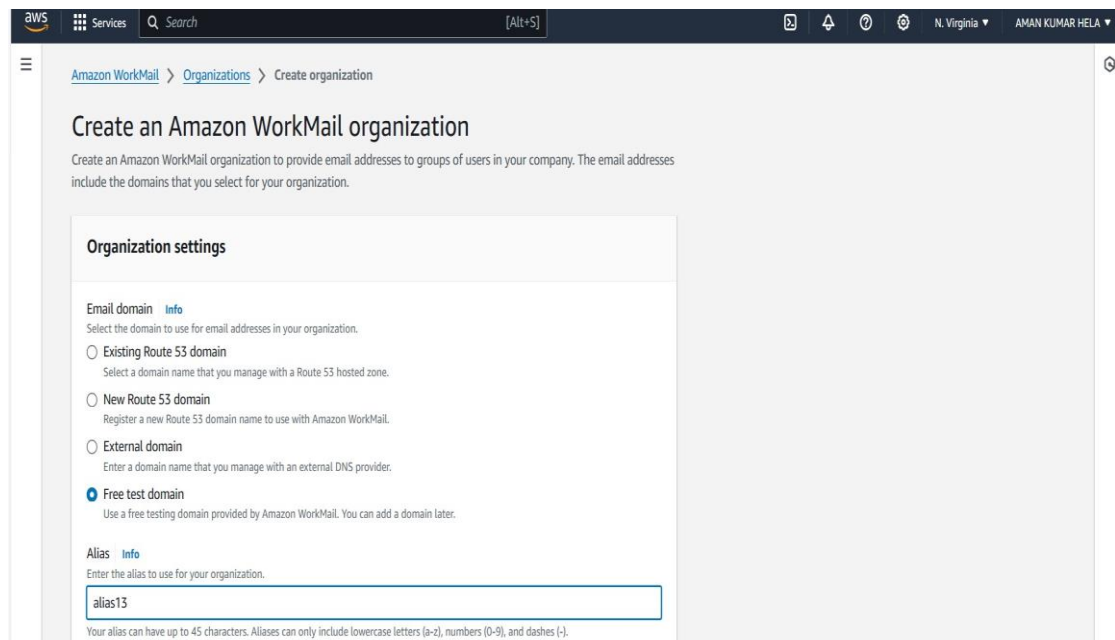

Create a work mail for your organization.

Steps:

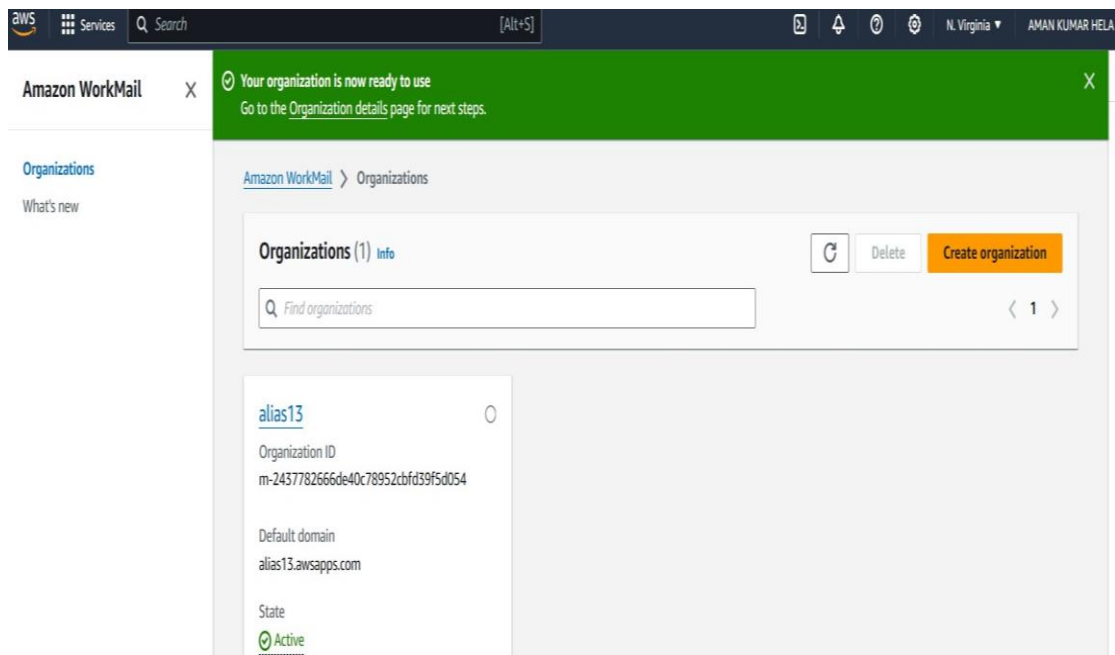

- I. At first goto Amazon Workmail.

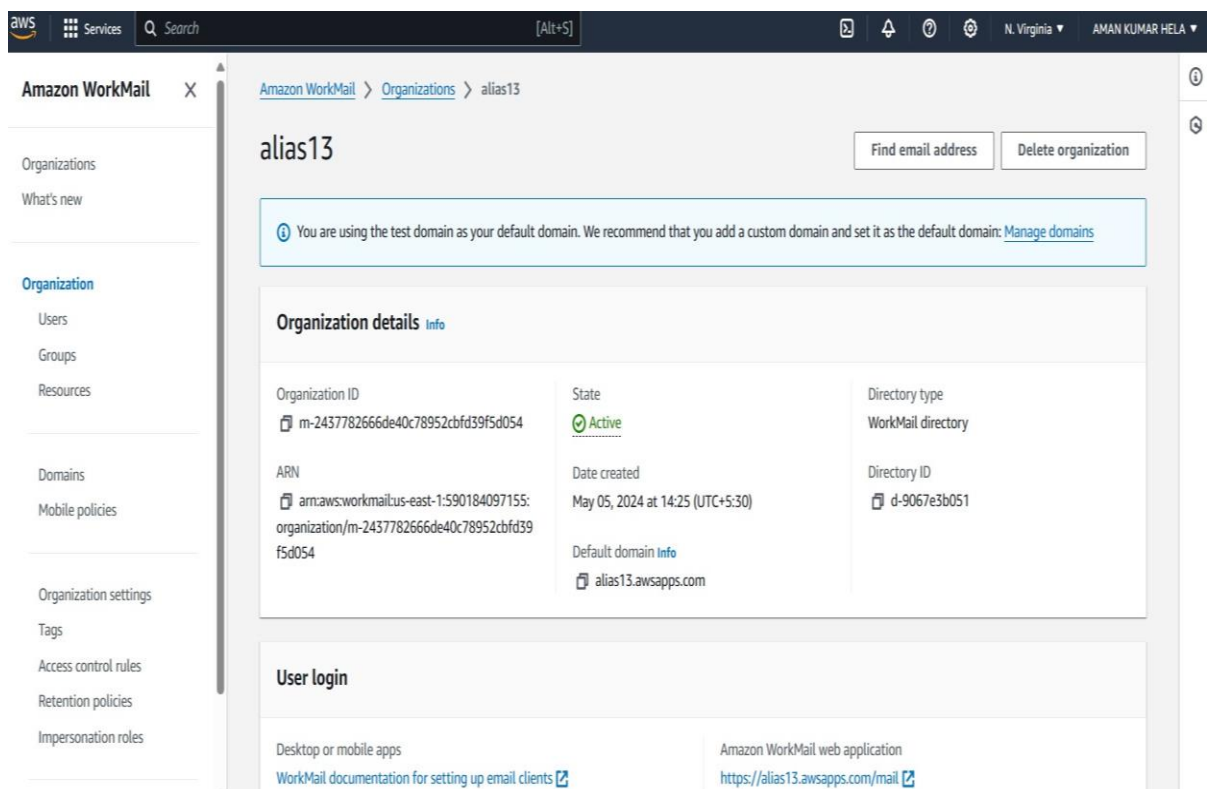

- II. Now click on Create organization and select Free test domain in Organization settings and give alias name.

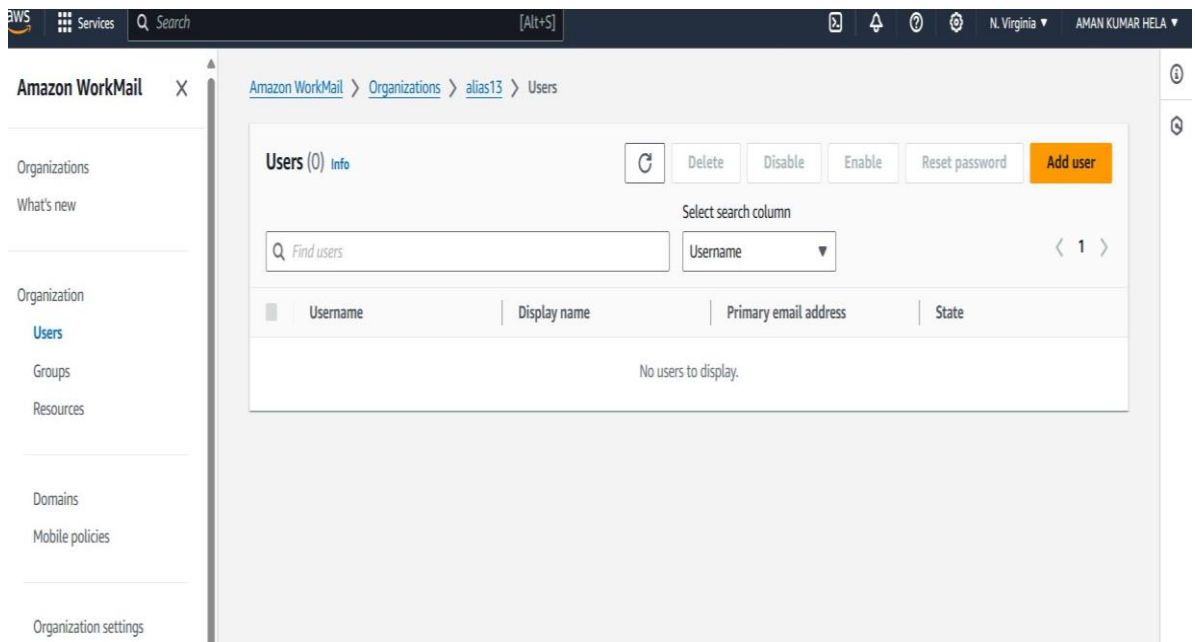

- III. Now click on Create organization and now click on name.

IV. Now in left side click on Users in Organization.

V. Now click on Add user.

VI. After it fill all User details.

VII. Give password and then repeat password and now click on Add user.

Email address
Primary email address to be used for this user.

akr1 @ alias13.awsapps.com

☒ **Show in global address list**
By default, all enabled users appear in the global address list. You can hide a user from the global address list.

☐ **Remote user**
You can select this option if the user is in a remote system. This will create an address book entry for the user, but not a mailbox.

Password setup

Password
Password for the user to log in with.

Passwords have an 8-character minimum with at least one character from three of these four categories: lowercase, uppercase, numeric, and special characters.

Repeat password

Cancel Add user

VIII. You can also click on User details to check all info.

Amazon WorkMail X

Amazon WorkMail > Organizations > alias13 > Users > akr1

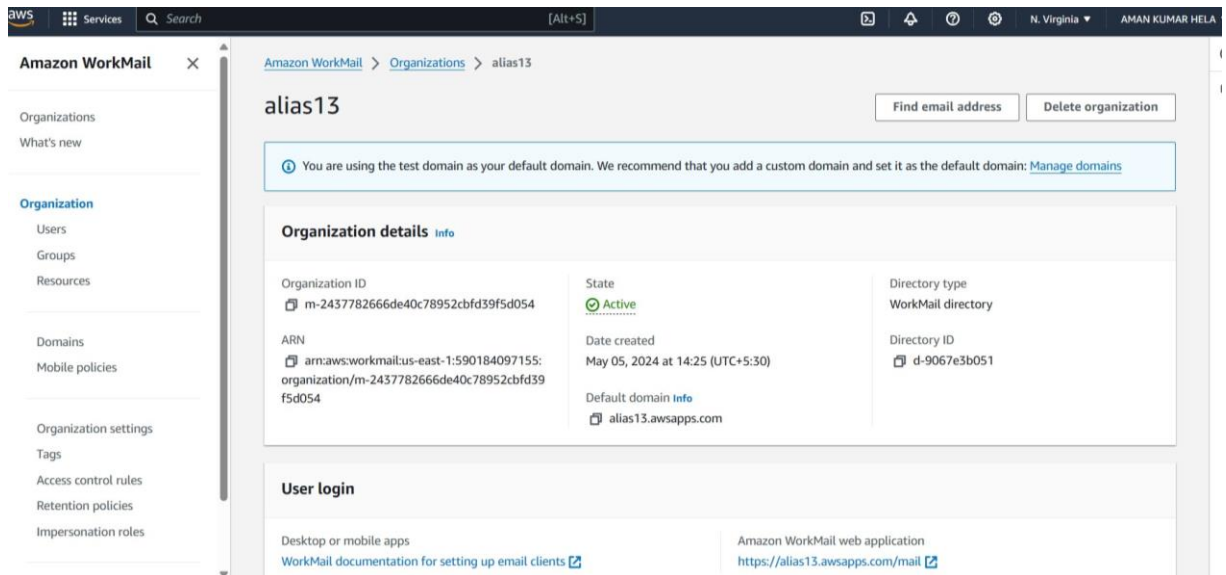

akr1 Edit

User details Info

Display name	Username
AMAN HELA	akr1

IX. Now come back to Organization and click on link in Amazon Workmail web application.

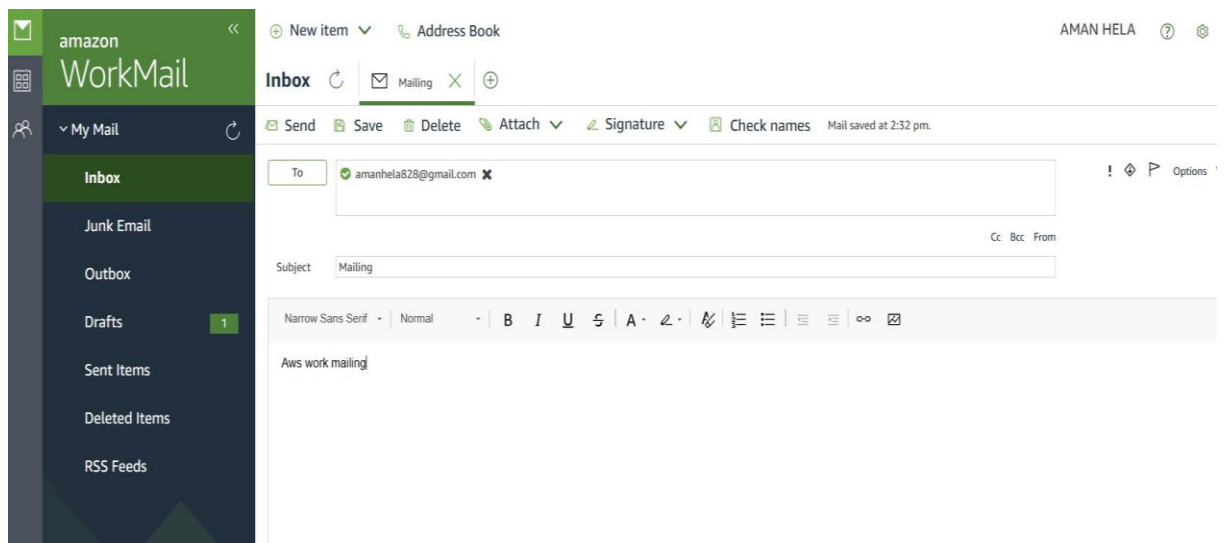

X. Give username and password and then Sign in.

The screenshot shows the Amazon WorkMail sign-in page. It features the Amazon WorkMail logo at the top. Below the logo, it says 'Please log in with your alias13 credentials'. There are two input fields: 'Username (not email address)' with the value 'akr' and 'Password' with masked characters. A 'Remember username' checkbox is present below the username field. A green 'Sign In' button is located below the password field. At the bottom, there is a disclaimer: 'By continuing, you agree to the AWS Customer Agreement or other agreement for AWS services, and the Privacy Notice. This site uses essential cookies. See our Cookie Notice for more information.'

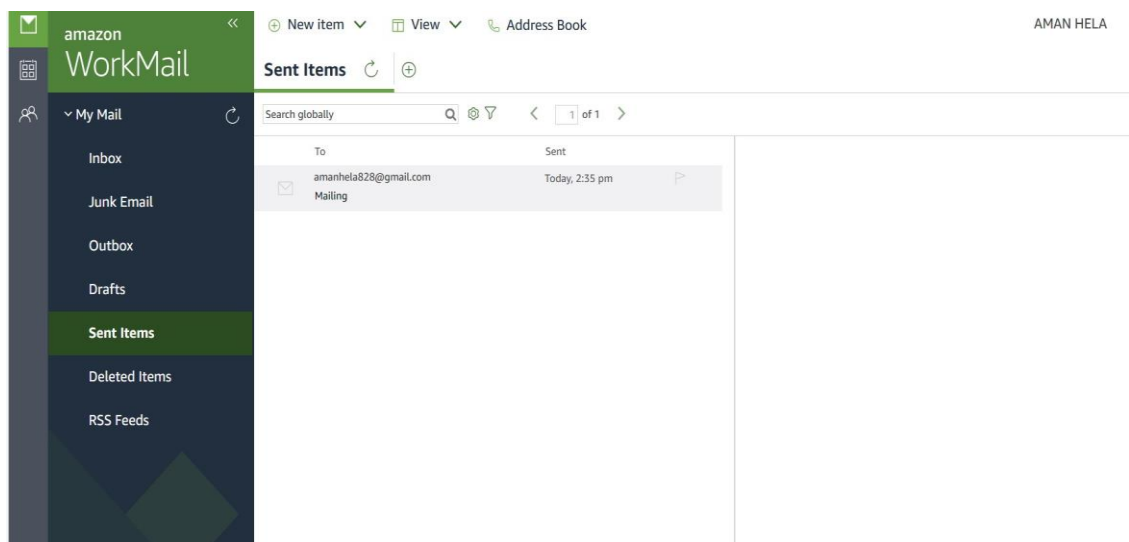

XI. Click on New item then new email.

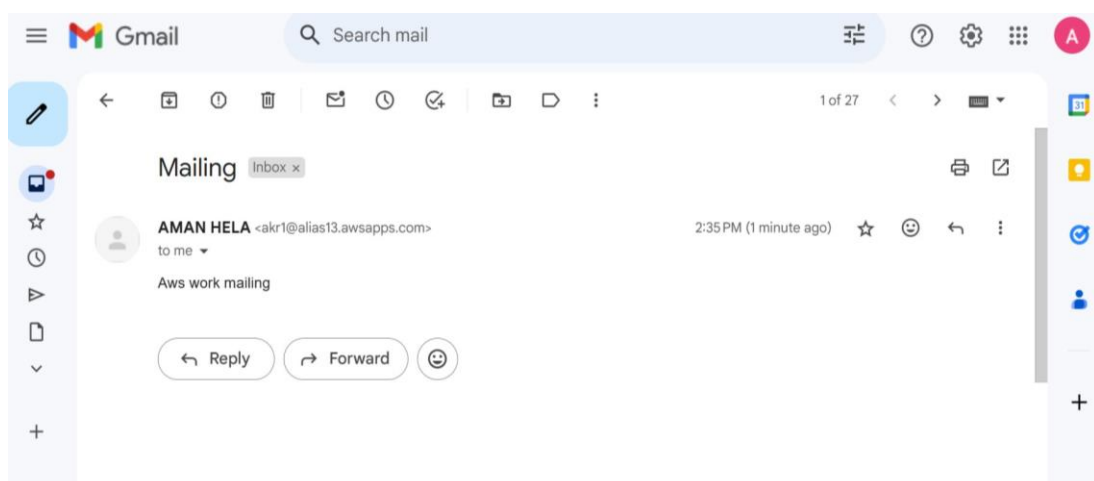

XII. Now give email id for sending and give subject and click on Send.

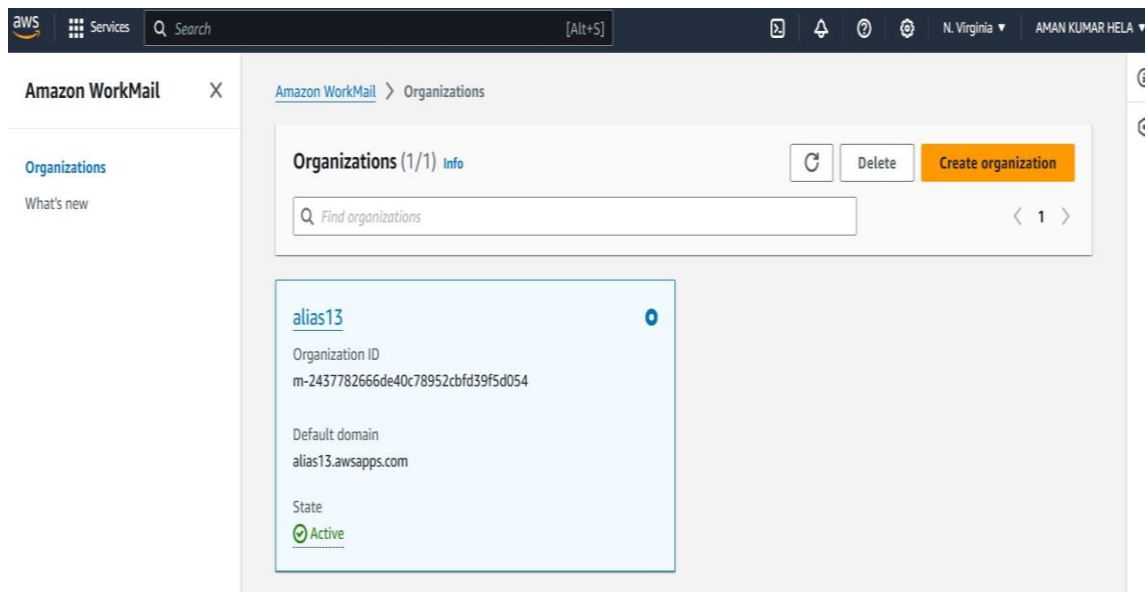

XIII. In send items you can see all send sent emails.

XIV. Now open email and you can see your sent email to given email id.

- XV. Now log out from opened Amazon Workmail and then select your created organization and then click on Delete.

- XVI. At last confirm deleting by giving organization name and click on Delete Organization.
